Connector Interface Pinout and Signal Description

The SB70 LC (100 and 200 version) board has one dual in-line 20 pin header (JP1) which enables you to quickly and easily connect to a NetBurner SB70 LC Adapter Board, or a board that you create on your own. The SB70 LC 200 version board has a 10-pin header (JP2) instead of the RJ-45 jack. Tables 1 and 2 provide descriptions of pin function for the JP1 header and JP2, respectively.

Table 1: Multi-function I/O Connector (JP1) Pinout and Signal Descriptions ^(1, 2)
